**Art Unit: 1621** 

#### **DETAILED ACTION**

#### Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

#### **Drawings**

2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings contain extraneous dotted gray lines in numerous locations. Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### **Specification**

3. The disclosure is objected to because of the following informalities: Applicants should update the first sentence of the specification reflect issuance of the parent application as US 6,794,537. Appropriate correction is required.

Art Unit: 1621

# Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 4. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites the limitation "composition consisting of Se-methyl-L-selenocysteine". A composition cannot consist of a single compound. Claim 1 and its dependents are therefore rendered indefinite. NOTE: The Examiner recommends that the term "comprising" be used instead of "consisting of".
- 5. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 2 recites the limitation "Se-methyl-L- selenocysteine combined with black pepper extract". There is insufficient antecedent basis for this limitation in the claim since claim 1 excludes any component other than Se-methyl-Lselenocysteine. Claim 2 is therefore rendered indefinite.

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

<sup>(</sup>b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1621

6. Claims 1 and 3-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Andreadou et al (Journal of Medicinal Chemistry, Synthesis of Novel Se-Substituted Selenocysteine Derivatives as Potential Kidney Selective Prodrugs of Biologically Active Selenol Compounds: Evaluation of Kinetics of β-Elimination Reactions in Rat Renal Cytosol, 1996, 39(10), pages 2040-2046). Andreadou discloses (Page 2042, top, Table 1, entry 1; and page 2043, column 2, lines 9-13) the compound Semethyl-L- selenocysteine. Andreadou therefore anticipates claims 1 and 3-8.

### Claim Objections

7. Claims 3-8 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claims, or amend the claims to place the claims in proper dependent form, or rewrite the claims in independent form. Claims 3-8 only describe properties of the composition of claim 1 and do not further limit it.

# Allowable Subject Matter

8. Claim 2 appears to be drawn to allowable subject matter. The following is a statement of reasons for the indication of allowable subject matter: The closest prior art, Andreadou, neither discloses nor fairly suggests a composition consisting of or comprising Se-methyl-L- selenocysteine and black pepper extract. The instantly claimed composition is therefore patentable over Andrade.

Art Unit: 1621

### Examin r's Suggestion

9. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

Applicant is advised of the availability of the publication "Attorneys and Agents Registered to Practice Before the U.S. Patent and Trademark Office." This publication is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

## Conclusion

10. Claims 1-8 are pending. Claims 1-8 are rejected. Claims 1, and 3-8 are objected to.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul A. Zucker whose telephone number is 571-272-0650. The examiner can normally be reached on Monday-Friday 7:00-3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann R. Richter can be reached on 571-272-0646. The fax phone
